Excel chart automatically go to power point presentation
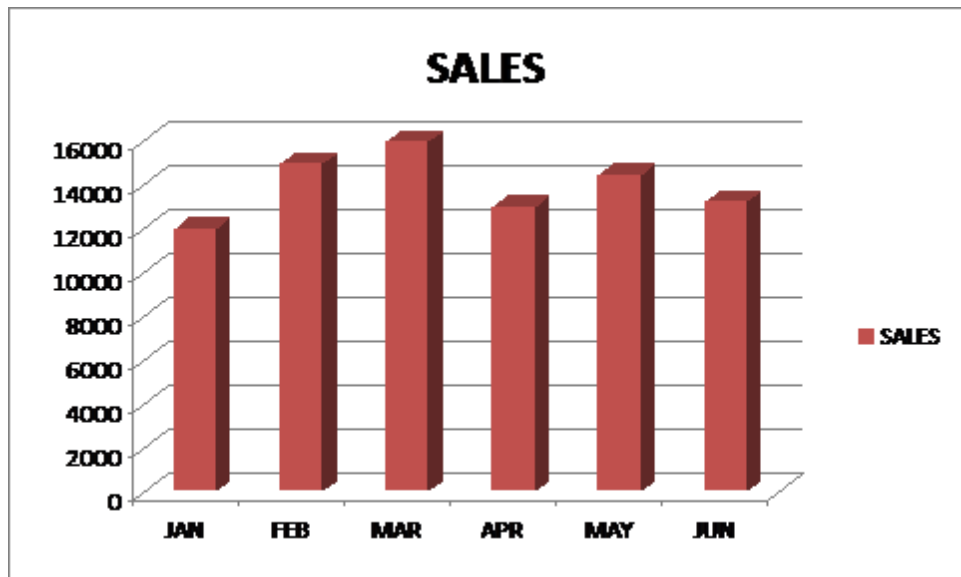

Excel chart automatically go to power point presentation by making a macro as below.

Create a macro and type as below. Or create a button type the following in the button click event. Before this add power point library in VBA tools reference.

```
Sub PP()
Dim newpowerpoint As PowerPoint.Application
Dim activeslide As PowerPoint.Slide
Dim cht As excel.ChartObject
On Error Resume Next
    Set newpowerpoint = GetObject(, "PowerPoint.Application")
    On Error GoTo 0
If newpowerpoint Is Nothing Then
Set newpowerpoint = New PowerPoint.Application
End If
If newpowerpoint.Presentations.Count = 0 Then
newpowerpoint.Presentations.Add
End If
newpowerpoint.Visible = True
For Each cht In ActiveSheet.ChartObjects
newpowerpoint.ActivePresentation.Slides.Add
newpowerpoint.ActivePresentation.Slides.Count + 1, ppLayoutText
newpowerpoint.ActiveWindow.View.GotoSlide
newpowerpoint.ActivePresentation.Slides.Count
Set activeslide =
newpowerpoint.ActivePresentation.Slides(newpowerpoint.ActivePresentation.Slides.Count)
cht.Select
ActiveChart.ChartArea.Copy
activeslide.Shapes.PasteSpecial(DataType:=ppPasteMetafilePicture).Select
activeslide.Shapes(1).TextFrame.TextRange.Text = cht.Chart.ChartTitle.Text
newpowerpoint.ActiveWindow.Selection.ShapeRange.Left = 100
newpowerpoint.ActiveWindow.Selection.ShapeRange.Top = 200
Next
AppActivate ("MICROSOFT POWERPOINT")
Set activeslide = Nothing
Set newpowerpoint = Nothing
End Sub
```

The excel sheet looks like

MONTH	SALES
JAN	12000
FEB	15000
MAR	16000
APR	13000
MAY	14500
JUN	13250

On executing the PP macro the chart will be shown in the powerpoint slide .
